

CPU isolated warm-inference latency by batch size

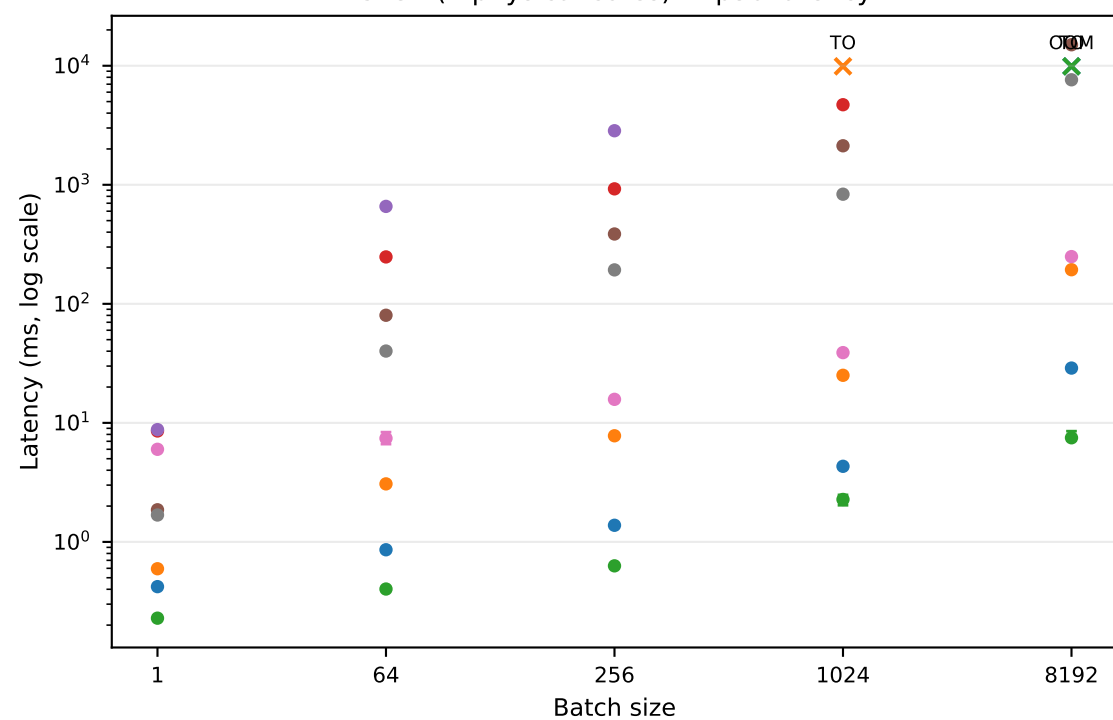

CPU1 (1 physical core) — p50 latency

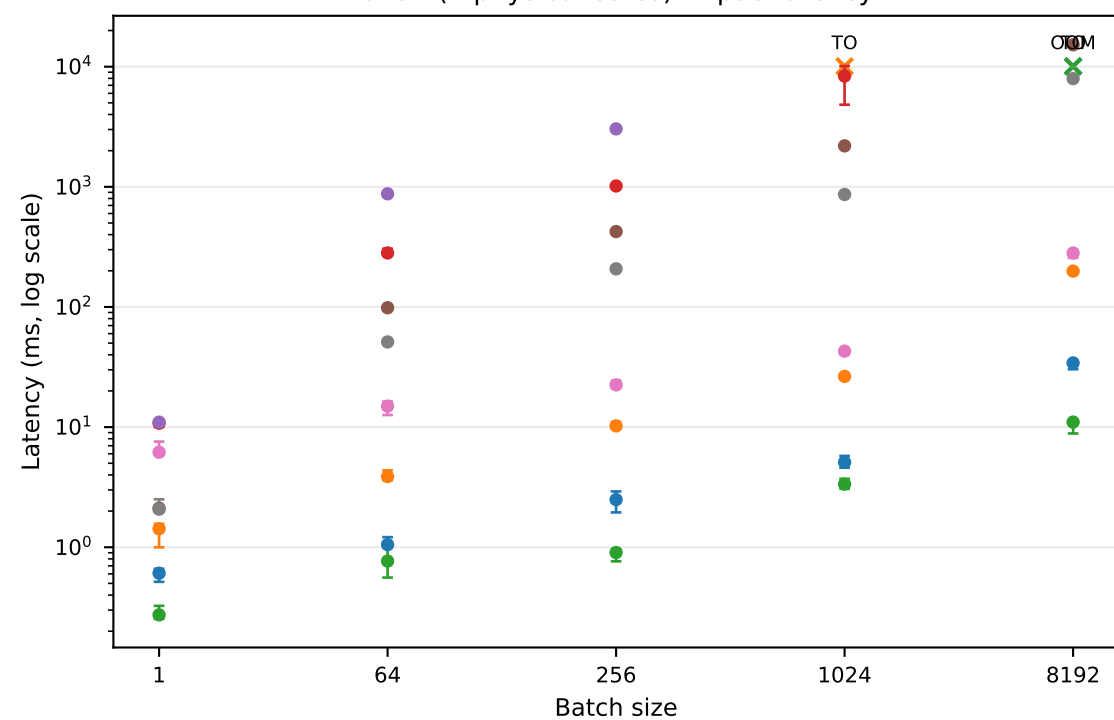

CPU1 (1 physical core) — p95 latency

CPU2 (2 physical cores) — p50 latency

CPU2 (2 physical cores) — p95 latency

Points are Stage26-2 estimates; error bars are correct for Stage26-2 95% intervals. X annotations preserve OOM/timeout outcomes; no line interpolation is used.
